

Hård-Lite®

Model • RWT TRI 350 - HL

The RWT **Hård-Lite** (design and patent protected) is a next generation side tipper and is a leader in its class, with a solid reputation for quality, long lasting construction and reliability.

All components are computer profile cut for neatness and accuracy. This model can be manufactured to your specification and applications.

STANDARD FEATURES

- RWT is a certified member of SSAB Inner Strenx & Hardox In My Body.
- Chassis fabricated from Strenx high strength steel.
- Body completely fabricated from high quality, hi-tensile Hardox steel giving maximum strength and minimum wear capabilities.
- New design 'floating body' for improved strength, minimal impact damage and improved load ejection.
- Tare weight advantage due to the latest design techniques.
- Body completely fabricated from hi-tensile Hardox high quality steel, giving maximum strength and minimum wear capabilities.
- Fully welded body and chassis to eliminate corrosion and load contamination.
- Body and chassis abrasive blasted prior to painting in 2 pak primer and paint.
- Body and chassis abrasive blasted prior to painting in 2 pak primer and paint.
- RWT unique single valve incorporating in built pressure protection and sequence valve to ensure door opens fully before body is lifted.

- Fold down aluminium lid.

- Aluminium pivot lid.

- Front to rear tarp.

- Formed coaming sections & complete body fabricated from Hardox.

- Fabricated tow bracket to rear with air, electrical, hydraulic couplings and coupling of your choice.

- Landing leg protection rubber flap available upon request.

- Durable RWT mudflaps and flexiguard to prevent mud build-up and stone chip damage to trailer.

- Stainless steel hydraulic pipes and hoses covered in spiral conduit to minimise wear, positioned in optimal location.

- Hella LED lights fitted to stainless steel arms with rubber protection.

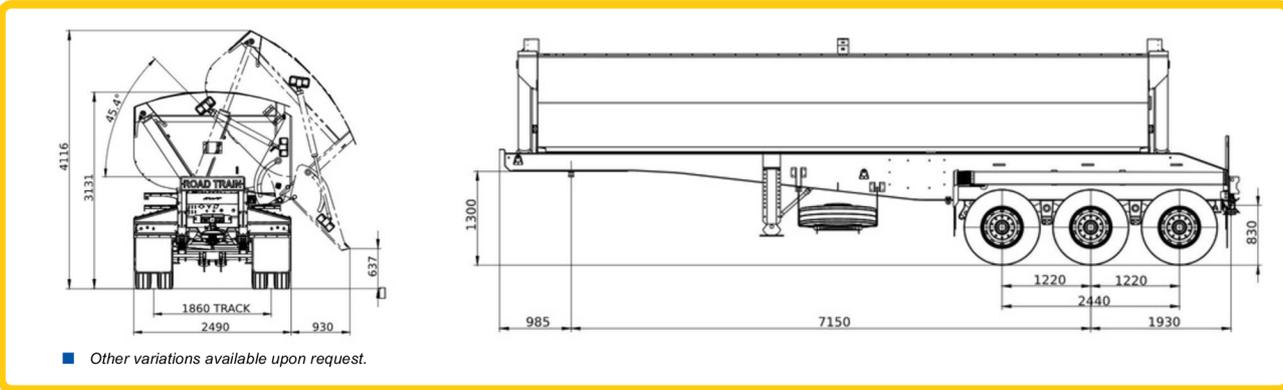

- Plug and play wiring loom using double O-ring sealed Deutsch plugs.

- Rubber grommets to reduce wear and tear on electrical and air components.

- Wiring harness and air lines neatly secured against the chassis to reduce damage and for ease of maintenance.

Roadwest RWT reserves the right to change or alter the specifications on any of their trailers or products without notice.
